DETAILED ACTION

1. Claims 11-50 have been examined.
2. This application is a division of U.S. patent application #09/253,057, filed on 02/19/1999, now U.S. patent #6,266,651., which is a continuation of U.S. patent application #09/166,779, filed on 10/06/1998, which is a division of patent application #08/554,704, filed on 11/07/1995, now patent #5,845,265, which is a continuation in part of patent application #08/427,820, filed on 04/26/1995. Applicant claims priority to patent application #08/427,820. Examiner accepts the priority claim of applicant to patent application #09/166,779, but requires applicant to particularly point out and cross reference those sections of application #08/427,820 to the claims of the present application that disclose these claims, to support his claim for priority.

Drawings

3. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3625

5. Claims 17 and 41 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claim language states "wherein the electronic transactional system is implemented on a computer system that also hosts an electronic auction system." Correction is required.

6. Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 27 states "and the second transactional tier electronic." in line 9. Examiner cannot determine the language of the claimed feature with certainty. For examination purposes, examiner has assumed that the applicant's intent was to claim "and the second transactional tier." Correction is required.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3625

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11-50 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. 6,266,651. Although the conflicting claims are not identical, they are not patentably distinct from each other, because they claim the same subject matter, even though one claims an auction and the other claims commercial transactions.

The subject matter claimed in claims 11, 27, 36, and 46 of the instant application is fully disclosed by claims 1, 26, and 45 of the patent. The only difference between the claims is: the patent discloses a computer-implemented two-tiered electronic auction system, while the application discloses a computer-implemented electronic transactional system comprising the same features as the patent. Examiner considers the two systems as equivalent systems for purposes of examination since the computer-implemented two-tiered electronic auction system is a computer-implemented electronic transactional system that discloses the claimed aspects of the computer-implemented electronic transactional system. Therefore, the patent and the instant application are considered equivalent.

Response to Arguments

8. Applicant's arguments with respect to claims 11-50 have been considered but are moot in view of the new ground(s) of rejection.

Status of Claims

9. Claims 11-50 would be allowable pending the filing of a proper and timely terminal disclaimer and pending correction of the 35 USC § 112 rejection. The instant invention relates to a novel and unobvious system and method for a computer-implemented electronic transactional system. The allowable subject matter is:
- a) (as per independent claims 11, 36) a data repository storing information corresponding to an inventory of one or more available items;
 - b) (as per independent claims 11, 27, 36) a first tier providing a first participant access to the inventory of one or more items in the data repository, the inventory being offered to the first participant under a first pricing scheme;
 - c) (as per independent claims 11, 27, 36) a second tier providing a second participant, different from the first participant, access to the inventory of one or more items in the data repository being offered to the second participant under a second pricing scheme different from the first pricing scheme;
 - d) (as per independent claims 11, 27, 36) differentiating first participants from second participants;
 - e) (as per dependent claim 46, depending from claim 36) presenting for auction an item description stored in a database operationally coupled to the electronic auction system.

Conclusion
